

**WOLF'S
MOUNTAIN**

Land of origin

DOG FOOD

GRAIN FREE

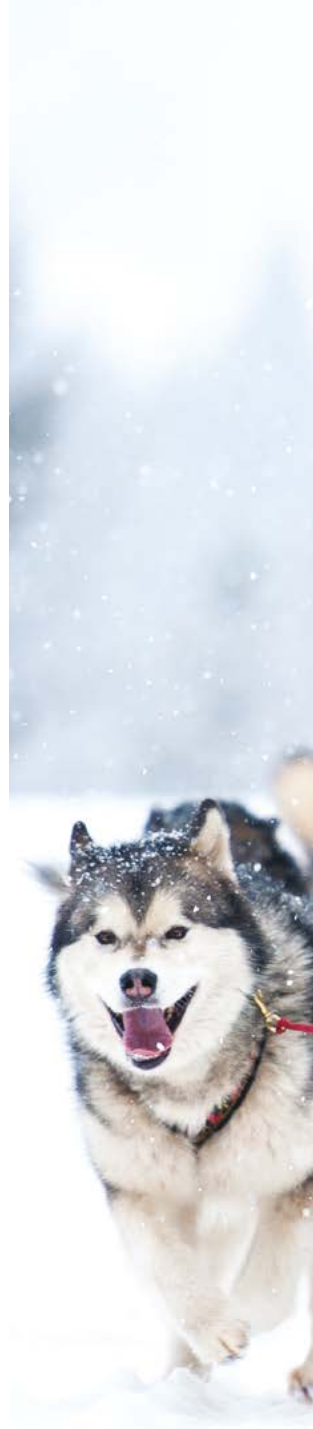

EUROPEAN INGREDIENTS

Go back to origins and keep close to the requirements of nature, get inspired by it to provide an authentic nutrition for the health and well-being of your dog throughout his life.

We, at Wolf's Mountain, remain a family business, engaged since over 20 years in high quality petfood. Our aim and our ambition never changed over the years: to provide the authentic nutrients that really meet the nutritional needs of our dogs.

Our philosophy is to go back to the Land of Origin selecting the most appropriate and best quality natural food. To reach this goal we focus the greatest attention to choosing and using only quality European ingredients from farmers and providers we have trusted for many years (European legislation of raising animals and farming is the strictest worldwide). Personally I'm proud of our recipes.

*If you love your dog as much
as I love mine, I am sure that
you will follow our philosophy
and trust Wolf's Mountain. -*

Olivier Schimpf

Founder of the brand

WHAT MAKES US DIFFERENT ?

ETHICAL VALUES

At Wolf's Mountain we are proud that all our products are made with European ingredients which respect perfectly our philosophy and our quality chart.

GRAIN FREE FOOD

Feed your dog as a carnivore and provide high content of meat proteins. Hypoallergenic and safe for dogs with allergies. Does not contain any grain.

Land of origin

We have chosen not to follow any marketing or profitability guidelines. We keep close to nature's requirements and provide authentic nutrition for lifelong canine health.

Respecting and preserving our environment's resources are part of our values and apply to both humans and animals.

GUARANTEED GMO FREE

Our raw materials are GMO free and consequently our products are also GMO free. Meats used in our recipes come from animals not fed with GMO products.

HYPOALLERGENIC FOOD

We use only the highest quality ingredients and all products are subject to regular quality controls. All incoming raw materials are inspected and tested by our laboratory. We work in a closed environment for the preservation and the security of all our food products.

NATURAL PRESERVATIVES

Rosemary extract is used as a natural antioxidant and preservative. It is also considered as anti-cancer agent.

ANTI-INFLAMMATORY EFFECTS

Our recipes contain glucosamine and chondroitin promoting healthy cartilage in joints. Our food may contribute to relieve arthritis or dysplasia problems.

NATURAL ANTIOXIDANTS

Our recipes contain L-carnitine, that is essential in the process of converting fatty acids into energy, it helps to decrease the level of cholesterol and fats in the blood.

WATER

Spring water is naturally balanced. Captured at the heart of the underground springs, the water does not need any treatment for eliminating organic and inorganic contaminants. It is free of phosphates and heavy metals.

- 100% grain and gluten free
- GMO free, no growth hormones
- Not tested on animals
- Tested by independent laboratory regarding the presence of petrochemical elements

**APPROVED BY
VETERINARIANS**

Quality and traceability engagements

The production of Wolf's Mountain dog food has been certified with the IFS – International Food Standard, one of the most important and most widely recognized certificates in the food-processing industry. We also employ the HACCP system and are under continuous supervision by the control authorities of the EU.

Water analysis

We are aware of the presence of petrochemical trace elements in water, that is why at Wolf's Mountain we use only water which is controlled and approved.

Safety and technology

We use only the highest quality ingredients and the quality of all products is regularly controlled. All incoming raw materials are inspected and analyzed by our laboratory. We work in an enclosed environment for the preservation and the security of all our food products.

Pesticides and mycotoxins

Pesticides and mycotoxins

Our products are analyzed by an independent laboratory which certifies that Wolf's Mountain food carries no risk of contamination by pesticides and mycotoxins.

A collection of fresh green herbs, including what appears to be thyme and parsley, and several small, dark, round seeds are scattered across the top of the page, above the main text area.

Enhancing health with fruits and vegetables

Herbs and vegetables (alfalfa, nettle, dandelion, plantago lanceolata, garden parsley, milk thistle, chicory root, rosemary) are rich in proteins, vitamins and minerals that are easily digestible. They contribute to boost the immune system, reduce inflammation, having anti-inflammatory effects and detoxifying properties. Their positive effects on the health of your dog are numerous.

Fruits (apple, pineapple, rose hip, goji berries, blackcurrant) are rich source of fibers and vitamins. They are natural antioxidants and contribute to reduce inflammation and possibly reduce the risk of some cancers.

Goji berries : they have a very high nutritional value and contain the 8 essential amino acids, one of the highest sources of antioxidants. They contain also B vitamins and Vitamin E, anti-inflammatory agent which lowers cholesterol, with essential fatty acids that promote body fat loss, anti-bacterial and anti-fungal and strengthen the immune system.

Peas : contain health-promoting antioxidants as well as a wide spectrum of nutrients including vitamins C, K and B1, manganese, fiber and folate (that promotes rapid cell regeneration).

Yucca extract : Extract from the yucca plant is said to naturally help the body remove toxins and facilitate digestion. Yucca extract may also reduce body odour as well as the smell of the urine/feces.

A collection of fresh green herbs, including what appears to be rosemary, and several small, dark, round seeds are scattered across the bottom of the page, below the main text area.

DIFFERENT SOURCES OF ANIMAL PROTEINS TO MEET DOGS' NUTRITIONAL NEEDS

Lamb

Lamb meat is rich in high quality protein, hypoallergenic, used to reduce the risk of allergies. It is an excellent source of many vitamins and minerals, contains a high quantity of zinc which helps the immune system, iron for the transport of oxygen and the formation of red blood cells, phosphorus for its essential role in the development and the maintenance of bones and teeth, vitamin B2 which contributes to a better metabolism of energy in all cells.

Turkey

Turkey is an excellent source of protein and low in calories and fat. It helps to increase the feeling of satiety, ensures maintenance of lean muscle mass. It is a good nutritional source of iron, zinc, potassium and phosphorus and contains also Vitamin B6 which plays a major role in making proteins, hormones and neurotransmitters.

Chicken

Light and highly digestible, chicken meat is rich in iron and zinc and useful to protect the skin, promotes a healthy skin and shiny coat. It is a very good source, not only of protein, but also of vitamins and minerals. It helps to reduce the risk of cardiovascular problems and boosts the reproductive system.

Hydrolyzed chicken liver filters toxins, works to aid digestion, is a powerful antioxidant as it is one of the most concentrated sources of natural Vitamin A of any food. Liver is also a great source of folic acid, B vitamins and especially Vitamin B12, which help with fatigue, mental ability and nerve health.

Game meat

Combination of meat coming from hunted wild boar, deer and fallow deer. Deer meat is very high in protein and low in fat, is lean and very nutritious and is an excellent meat for healthy dogs. Wild boar contains 70% red fiber to 30% white fiber, is very lean meat and contains all of the amino acids essential to dogs. Moreover, it is rich in iron, zinc, selenium and vitamin B6.

Fish

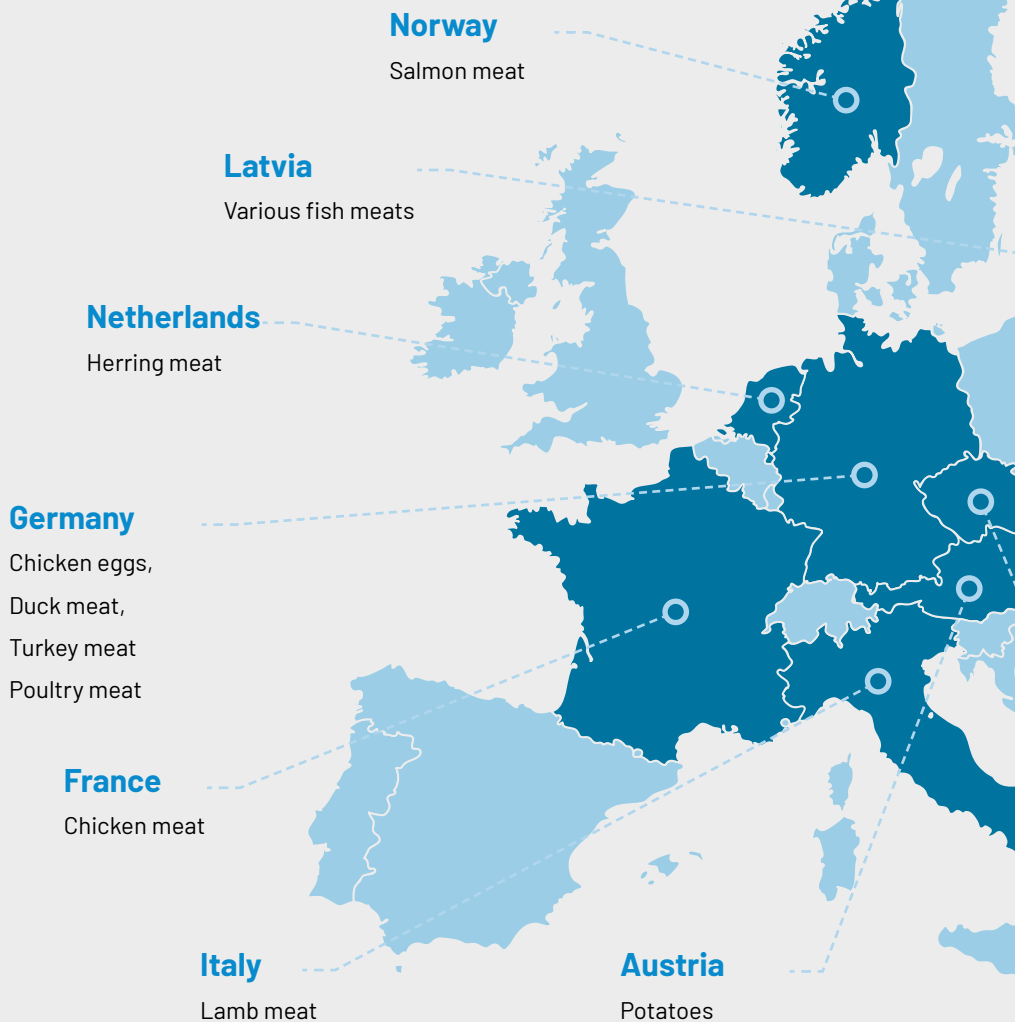

Fish meat is an ingredient of high biological value, an excellent and a complete source of protein, vit. A and D, rich in Omega 3 and provides the 9 essential amino acids. Wolf's Mountain combines 5 different fish meats: herring, codfish, conger, sardine and salmon. The different fish meats are naturally rich in Omega 3, iodine, selenium and vit B12; herring is a fatty marine fish naturally high in protein as well as omega 3 fatty acids. Salmon oil is naturally rich in the prized EPA and DHA type of omega-3 fatty acids.

Duck meat

Duck meat is naturally rich in the ten essential amino acids required by a dog to sustain life. Easily digestible, duck meat is a brilliant source of vitamin A, B3 and B12 as well as several minerals, rich in iron, zinc, selenium and copper.

ORIGIN OF OUR INGREDIENTS

Czech Republic

Game meat

Peas

We, at Wolf's Mountain decided to select the **best quality of raw materials** to ensure the **maximum nutritional benefits** in our recipes.

Our suppliers are breeders and providers of quality meat coming from animals raised as naturally as possible and fed without GMO products. This selection has a real impact on the quality of the meat and thus of our products.

We produce within the European Union and therefore comply with strict safety regulations and environmental standards.

In accordance with EU regulations:

- **Safety:** no use of antibiotics, no hormones for the feeding and raising of our farmers' animals.
- **Animal welfare:** our farmers raise their animals respecting their biological and physiological needs.
- **Traceability:** at all stages from the farm to the production, certified by the IFS-international food standard and the HACCP system.
- **Toxicity tested:** our products are tested by an independent laboratory which certifies that Wolf's Mountain food carries no risk of containing pesticides and mycotoxins.
